Oct, 2024 - Present

PROJECTS

Texas College Attendance System

- Developing a web-based attendance management system using ASP.NET Framework and ASP.NET Core.
- Designed an attractive and responsive user interface for students, teachers, and administrators.
- Implemented interfaces for attendance recording, management, and reporting.
- Focused on improving navigation, accessibility, responsiveness, and the overall user experience.
- Website: <https://texasattendance.com>

Smart Tourism Website

- Developed a smart tourism platform with artificial-intelligence integration.
- Built the project as part of a hackathon.
- Designed features to help users discover destinations and receive intelligent travel recommendations.
- Created an engaging and responsive interface for exploring tourism information.
- Integrated frontend components with APIs and AI-powered functionality.
- GitHub: <https://github.com/ompant2302u/Smart-tourism-app>

Coca-Cola Scroll Animation Website

- Designed and developed an interactive Coca-Cola-inspired website with scroll-based animations.
- Used modern frontend techniques to create smooth transitions and engaging visual effects.
- Focused on animation timing, page responsiveness, and interactive storytelling.
- GitHub: <https://github.com/ompant2302u/Animated-website>

Flight Ticket Booking System

- Developed a flight ticket booking system using Python and the Django framework.
- Implemented flight searching, booking, passenger-information management, and reservation-related functionality.
- Designed responsive interfaces for browsing available flights and completing bookings.
- Integrated frontend templates with Django views, models, and database operations.
- GitHub: <https://github.com/ompant2302u/Flight-ticket-booking-Django>
